Introduction of a temporary surcharge for raw materials and energy costs

Dear business partners,

Due to the ongoing geopolitical and economic challenges, we regret to say that we are obliged to introduce a temporary surcharge to cover raw material and energy costs.

From Monday 13 April 2026, the following rules will therefore apply to all deliveries and collections:

- Raw materials and energy surcharge (CPT), **Switzerland: €250.00 net per lorry**
- Raw materials and energy surcharge (CPT): **€150.00 net per lorry**
- Raw materials and energy surcharge (FCA): **€100.00 net per lorry**

The surcharge is calculated as a flat rate per lorry and shown separately on the relevant invoices. This also applies to existing orders, provided that delivery or collection takes place on or after the above-mentioned cut-off date.

Please also note the following billing arrangements:

- The surcharge is eligible for a discount
- No adjustment to the surcharge is permitted

This measure is temporary and will be reviewed on a regular basis. The aim is to respond appropriately to current cost trends whilst ensuring the usual standard of delivery and service.

We would like to express our sincere thanks for your understanding and for your continued trust and cooperation.

Kind regards

A blue ink signature of Steffen Zimny.
